DETAILED ACTION

Election/Restrictions

The election of species is maintained for the reasons of record.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 32-36, 38, 41, 42 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

There is no support for the phrase, "thereby preventing a disease" in the specification. The specification does not give any evidence to support that the disease is prevented. No data or other evidence can be found that such diseases would be prevented in animal models or other models. Without such support the claims are not enabled by the instant specification.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 10-18, 32-36, 38, 41 and 42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okada 1 (of record), Okada 2 (of record), Yanamoto et al., or Yonekura et al. in view of Gibboni et al., Babcock et al., and Brunck et al.

Applicant have argued that the individual references do not teach all of the claimed elements.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Each reference does not teach all of the claimed elements which is why this rejection is under 35 USC 103 and not 35 USC 102.

The reasons for the rejection have been presented earlier. It is clear that a doctor or patient that was going to be treated for a disease would have normal levels checked including blood pressure, glucose levels, etc. Physicians routinely check levels of patients before there undergo treatments for diseases to rule out certain other problems. To check the glucose levels of the patient would have been well within the purview of the skilled artisan. Once checked, one would have also checked free radical

production as stated before on the record. The motivation is clear. The rest of the flow of the method is of record.

Art was cited about treating pancreatitis, see Brunck.

Applicant has only pointed out pieces that are missing from specific references but the references were not expected to contain all of the claimed elements. The reasons that the references were used together and the logical flow of argument concerning the references were presented in the last office action.

The references establish that one of ordinary skill in the art would have been motivated to perform the claimed process.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
